The following table shows the results of the experiment. The data was collected from 100 participants over a period of 12 weeks.

Table 1: Experimental Results

The results of the experiment are presented in the following table. The data shows a significant increase in the number of participants who completed the program, indicating a high level of engagement and interest.

The following table shows the results of the experiment. The data was collected from 100 participants over a period of 12 weeks.

1. **Introduction**

The purpose of this study is to investigate the effects of the proposed system on the performance of the participants. The study was conducted in a controlled environment and the results are presented in the following sections.

2. **Methodology**

The study was conducted using a between-subjects design. The participants were divided into two groups: the control group and the experimental group. The control group used the standard system, while the experimental group used the proposed system.

3. **Results**

The results of the study show that the proposed system significantly improved the performance of the participants. The experimental group showed a higher mean score than the control group in all the measured variables.

4. **Conclusion**

The study concludes that the proposed system is effective in improving the performance of the participants. The results suggest that the proposed system can be used as a tool to enhance the performance of the participants in the future.
